DETAILED ACTION

1. Receipt is acknowledged of the amendment filed 10/29/02.

Claim Rejections - 35 USC § 102

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-27 are rejected under 35 U.S.C. 102(b) as being anticipated by Jukl et al, US Patent No. 5,786,827.

Jukl et al disclose a semiconductor optical storage device and uses thereof comprising: a semiconductor memory device for use in combination with an electrical display device, the memory device comprising a semiconductor chip including an array of electrically addressable data storing cells within said chip for electrical reading of data stored within said cells for input to an electrical display device for displaying said data as a first graphic image, said memory device having an externally viewable surface, means for storing a second graphic image on said surface for direct visual observation of said second image independently of electrical reading of data stored within said cells, and means for writing data from said second image into said array of cells whereby said first image displayed by said display device corresponds to and is derived from said second image visually observable on said memory device surface (see figures 1, 2, 10-13).

Response to Arguments

3. Applicant's arguments with respect to claims 1-27 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

Art Unit: 2876

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Schwarz, US Patent No. 5,835,429, discloses a data retention weak write circuit and method using the same. Walsh, US Patent No. 5,982,397, discloses a video graphic controller having locked and unlocked modes of operation.
